Professional Summary

Full-Stack Engineer specializing in backend-driven web applications using Spring Boot, React.js, and PostgreSQL. Experienced in developing REST APIs, implementing JWT-based authentication, and designing scalable system architectures. Passionate about building efficient, maintainable, and production-ready applications.

Skills

- **Programming Languages:** Java (OOP), JavaScript, HTML, CSS
- **Frameworks/Libraries:** Spring Boot, React.js, Bootstrap, Express.js, Node.js, Tailwind CSS
- **Tools & Technologies:** MySQL, PostgreSQL, Git, Version Control, Grid, Flexbox
- **Courses:** Full Stack Developer MERN (The SmartBridge)

Education

Vellore Institute of Technology
B.Tech in Computer Science Engineering

Oct 2022 – May 2026
CGPA: 8.19/10

Internship

Full Stack Developer Intern — DC Infotech, Mumbai

Dec 2024 – Mar 2025

- Developed internal web applications including a feedback portal and employee/admin management system using MongoDB, PostgreSQL, MySQL, Express.js, React.js, Node.js, Bootstrap, Tailwind CSS
- Designed and implemented RESTful APIs with secure authentication and optimized CRUD workflows

Projects

Ecom Catalog API – REST API for managing product catalog, search and media

GitHub

Technologies: Java, Spring Boot, Spring Data JPA, Spring Web, H2 Database, Lombok, Maven, GitHub

- Architected a full E-Commerce Product Management API supporting product CRUD operations, keyword search, and image upload/retrieval for seamless and scalable product catalog management.
- Implemented a clean controller–service–repository workflow for efficient and reliable product handling
- Added auto-loaded sample data and user/admin-style product access through REST endpoints

TravelUs – Group Travel Management Platform

GitHub

Technologies: React.js, Tailwind CSS, JavaScript, JWT, WebSockets, PostgreSQL, GitHub

- Built group Travel Management Platform enabling users to create groups, plan itineraries, share documents, track expenses, and collaborate through real-time chat and coordinated trip workflows across the platform
- Created responsive, accessible UI with Tailwind CSS and managed application state using Redux Toolkit
- Designed a backend supporting secure authentication, group operations, expense logic, and storage reliably

Vaiu Restaurant Booking Voice Agent – Full-Stack Conversational AI System

GitHub

Technologies: JavaScript, Node.js, Express.js, MongoDB, Mongoose, Web Speech API, REST APIs, Nodemailer (SMTP), Weather API, Tailwind CSS, HTML, CSS, GitHub

- Implemented a voice-enabled restaurant booking system using Web Speech API with automated speech-to-text, text-to-speech, NLP-style input parsing, and a real-time conversational workflow engine
- Engineered weather-based seating recommendations, double-booking prevention, and email confirmations
- Built an admin dashboard enabling booking management, analytics (peak hours, cuisine trends), CSV export

Miscellaneous

Languages: English, Hindi, Gujarati

Participant: Flipkart Grid 6.0 & 7.0

Club Coordinator: Gujarati Club, VIT Bhopal

Event Lead: Ramanujan Mathematics and SAP Club, VIT Bhopal
