Professional Summary

Full-Stack Engineer with strong experience building scalable web applications using React, Node.js, and modern databases. Skilled in designing REST APIs, real-time systems, authentication flows, and responsive UI architecture. Passionate about solving real-world problems through clean system design and efficient backend integration.

Skills

- **Programming Languages:** Java (OOP), JavaScript, HTML, CSS
- **Frameworks/Libraries:** React.js, Bootstrap, Express.js, Node.js, Tailwind CSS
- **Tools & Technologies:** MySQL, PostgreSQL, Git, Version Control, Grid, Flexbox
- **Courses:** The Complete Full-Stack Web Development Bootcamp (Udemy – Angela Yu); Full Stack Developer MERN (The SmartBridge)

Education

Vellore Institute of Technology Oct 2022 – May 2026
B.Tech in Computer Science Engineering CGPA: 8.19/10

Internship

Full Stack Developer Intern — DC Infotech, Mumbai Dec 2024 – Mar 2025

- Developed internal web applications including a feedback portal and employee/admin management system using MongoDB, PostgreSQL, MySQL, Express.js, React.js, Node.js, Bootstrap, Tailwind CSS
- Designed and implemented RESTful APIs with secure authentication and optimized CRUD workflows

Projects

Vaiu Restaurant Booking Voice Agent – Full-Stack Conversational AI System GitHub
Technologies: JavaScript, Node.js, Express.js, MongoDB, Mongoose, Web Speech API, REST APIs, Nodemailer (SMTP), Weather API, Tailwind CSS, HTML, CSS, GitHub

- Implemented a voice-enabled restaurant booking system using Web Speech API with automated speech-to-text, text-to-speech, NLP-style input parsing, and a real-time conversational workflow engine
- Engineered weather-based seating recommendations, double-booking prevention, and email confirmations
- Built an admin dashboard enabling booking management, analytics (peak hours, cuisine trends), CSV export

Crave Swipe – Tinder-Style Zomato Extension GitHub
Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JavaScript, GitHub

- Architected a Tinder-style Zomato extension leveraging React.js and Node.js to simplify food and restaurant discovery through an intuitive, swipe-based interface and real-time state management
- Integrated wishlist, personalized recommendations, and smart filtering to enhance user engagement
- Enhanced user experience through optimized and smooth UI interactions across devices

TravelUs – Group Travel Management Platform GitHub
Technologies: React.js, Tailwind CSS, JavaScript, JWT, WebSockets, PostgreSQL, GitHub

- Led frontend development of a scalable collaborative travel platform enabling seamless group creation, itinerary sharing, real-time chat, document storage, and efficient expense management
- Created responsive, accessible UI with Tailwind CSS and managed application state using Redux Toolkit
- Integrated frontend with Spring Boot backend using secure JWT-based authentication

Miscellaneous

Languages: English, Hindi, Gujarati
Participant: Flipkart Grid 6.0 & 7.0
Club Coordinator: Gujarati Club, VIT Bhopal
Event Lead: Ramanujan Mathematics and SAP Club, VIT Bhopal
