Coding Profiles: LeetCode | GeeksForGeeks | CodingNinjas

## Professional Summary

Detail-oriented Computer Science undergraduate with strong SQL and data analytics foundations. Experienced in building analytics dashboards, KPI tracking systems, and recommendation engines using PostgreSQL and Python. Seeking an entry-level Data Analyst / Technical Analyst role to apply data-driven problem solving.

## Skills

- **Programming Languages:** SQL (PostgreSQL), Python (Pandas), Java, JavaScript
- **Data & Analytics:** Data Cleaning, EDA, KPI Calculation, Aggregations, Ranking, Trend Analysis
- **Tools & Technologies:** MySQL, PostgreSQL, MongoDB, Excel, Git, Express.js, React.js
- **Concepts:** Relational Modeling, Indexing, Normalization

## Education

|                                            |                   |
|--------------------------------------------|-------------------|
| Vellore Institute of Technology - May 2026 | CGPA: 8.19/10     |
| B.Tech in Computer Science Engineering     |                   |
| Royal Science School (XII) - May 2021      | Percentage: 92.00 |
| Adarsh Education Society (X) - May 2019    | Percentage: 94.33 |

## Internship

**Full Stack Developer Intern — DC Infotech, Mumbai** Dec 2024 – Mar 2025

- Developed internal web apps with structured PostgreSQL schemas and REST APIs for efficient data handling.
- Optimized SQL queries and CRUD workflows to improve data retrieval performance and system reliability.

## Projects

**Merchant Insights – Business Analytics Dashboard** GitHub

*Technologies: PostgreSQL, Node.js, Express.js, React, SQL*

- Developed a merchant analytics dashboard with structured relational schema and SQL-driven KPI computation to analyze revenue trends, customer behavior patterns, and region-wise business performance metrics.
- Performed detailed region-wise revenue breakdown using optimized GROUP BY and ranking queries.
- Implemented monthly growth trend analysis to identify performance patterns and business opportunities.

**Global Footprint – Geospatial Analytics Dashboard** GitHub

*Technologies: PostgreSQL, Express.js, EJS, SQL*

- Developed a multi-user geospatial analytics dashboard enabling users to track visited countries on an interactive world map with structured relational data modeling and dynamic database-driven visualization.
- Implemented continent-wise aggregation, coverage metrics and user ranking using JOIN and GROUP BY queries.
- Designed monthly travel trend analysis using DATE\_TRUNC with indexed schema optimization for performance.

**Ecommerce Recommender System – Hybrid Recommendation Analytics** GitHub

*Technologies: Python, FastAPI, PostgreSQL, SQL*

- Designed and implemented a hybrid recommendation engine combining collaborative and content-based filtering techniques to deliver personalized product suggestions using structured interaction data modeling.
- Evaluated recommendation performance using Precision@K and ranking-based evaluation metrics.
- Developed personalized product ranking logic based on similarity scoring and user interaction data.

## Miscellaneous

**Languages:** English, Hindi, Gujarati

**Participant:** Flipkart Grid 6.0 & 7.0

**Club Coordinator:** Gujarati Club, VIT Bhopal

**Event Lead:** Ramanujan Mathematics and SAP Club, VIT Bhopal

**Attendee:** c0c0n 2023 – Cybersecurity Event by Kerala Police
