Professional Summary

Data-focused Computer Science undergraduate with hands-on experience in SQL analytics, KPI tracking, and dashboard development. Proficient in PostgreSQL, Excel, Power BI, and Python (Pandas) for data cleaning, exploratory data analysis, and trend analysis. Seeking an entry-level Data Analyst role to deliver data-driven insights.

Skills

- **Languages & Querying:** SQL (PostgreSQL, MySQL), Python (Pandas)
- **Data & Analytics:** Data Cleaning, EDA, KPI Calculation, Aggregations, Ranking Functions, Trend Analysis
- **Visualization & BI Tools:** Power BI (Dashboard Design, Basic DAX), Excel (Pivot Tables, Charts)
- **Database & Concepts:** Relational Modeling, Indexing, Query Optimization, Normalization

Education

Vellore Institute of Technology - B.Tech in Computer Science (May 2026)	CGPA: 8.19/10
Class XII (May 2021)	Percentage: 92.00
Class X (May 2019)	Percentage: 94.33

Internship

Developer Intern — DC Infotech, Mumbai	Dec 2024 – Mar 2025
• Developed internal web apps with structured PostgreSQL schemas and REST APIs for efficient data handling. • Optimized SQL queries and CRUD workflows, improving data retrieval performance and overall system reliability.	

Projects

Merchant Insights – Business Analytics Dashboard	GitHub
<i>Technologies: PostgreSQL, Node.js, Express.js, React, SQL</i>	
• Built a merchant analytics dashboard with a structured relational schema and SQL-driven KPI computation to analyze revenue trends, customer behavior patterns, and region-wise business performance metrics. • Conducted detailed region-wise revenue breakdown using optimized GROUP BY and ranking queries. • Generated monthly growth trend analysis to identify performance patterns and key business opportunities.	

Global Footprint – Geospatial Analytics Dashboard	GitHub
<i>Technologies: PostgreSQL, Express.js, EJS, SQL</i>	
• Developed a multi-user geospatial analytics dashboard enabling users to track visited countries on an interactive world map with structured relational data modeling and dynamic database-driven visualization. • Implemented continent-wise aggregation, coverage metrics, and user ranking using JOIN and GROUP BY queries. • Executed monthly travel trend analysis using DATE_TRUNC with indexed schema optimization for performance.	

Ecommerce Recommender System – Hybrid Recommendation Analytics	GitHub
<i>Technologies: Python, FastAPI, PostgreSQL, SQL</i>	
• Designed and implemented a hybrid recommendation engine combining collaborative and content-based filtering techniques to deliver personalized product suggestions using structured interaction data modeling. • Evaluated recommendation performance using Precision@K and ranking-based evaluation metrics. • Formulated personalized product ranking logic based on similarity scoring and user interaction data.	

Miscellaneous

Languages: English, Hindi, Gujarati
Participant: Flipkart Grid 6.0 & 7.0
Club Coordinator: Gujarati Club, VIT Bhopal
Event Lead: Ramanujan Mathematics and SAP Club, VIT Bhopal
Attendee: c0c0n 2023 – Cybersecurity Event by Kerala Police
